About me:

I had to move to the Netherlands due to the terrible war in my motherland - Ukraine. So, now I must find a job to provide for my needs before my education is finished.

But I continue studying at my Kyiv college. We have a special studying format with online lessons and shortened days.

Also, I have my own privilege of a flexible study timetable. Thanks to the flexible timetable I have been working as a freelancer during last year. Thus I have the possibility to combine studying and working.
